GRAY CAPITAL OPPORTUNITY PORTFOLIO (AG)

PORTFOLIO INFORMATION DOCUMENT

30 JUNE 2021

INVESTMENT OBJECTIVE

The Gray Capital Opportunity Portfolio's strategy is to provide investors with a well-diversified multi-managed growth portfolio that aims to produce high long-term total returns through diversification of asset managers and investment styles. The portfolio can be fully invested in growth assets with up to 100% exposure to foreign assets.

RISK PROFILE

Low | Low - Moderate

- This portfolio has low or no equity exposure, resulting in far less volatility than more aggressive mandated portfolios and in turn the probability of a long-term capital loss is much less likely. However, expected potential long term investment returns could be lower over the medium to long term.
- Where the asset allocation contained in this MDD reflect offshore exposure, the portfolio is exposed to currency risks.
- The portfolio is exposed to default and interest rate risks.
- Therefore, it is suitable for short to medium term investment horizons.

Moderate | Moderate - High

- This portfolio holds more equity exposure than a low risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a low risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a low risk portfolio, but less than a high-risk portfolio and the expected potential long term investment returns could therefore be lower than a high-risk portfolio due to lower equity exposure, but higher than a low risk portfolio.
- Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks.
- The portfolio is exposed to default as well as default and interest rate risks.
- Therefore, it is suitable for medium term investment horizons.

High

- This portfolio holds more equity exposure than any other risk profiled portfolio and therefore tend to carry higher volatility due to high exposure to equity markets.
- Expected potential long term returns could be higher than other risk profiles and in turn the risk of potential capital losses is higher.
- Where the asset allocation contained in this MDD reflect offshore exposure, the portfolio is exposed to currency risks.
- Therefore, it is suitable for long term investment horizons.

GRAY CAPITAL OPPORTUNITY PORTFOLIO (AG)

PORTFOLIO INFORMATION DOCUMENT | 30 JUNE 2021

MARKET COMMENTARY

*South African index returns are quoted in rands, while all other return figures are quoted in USD terms.

Market performance was mixed in June, especially among equity markets while bond yields ended mostly higher. The positive economic indicators and factors that have been driving markets this year were partly overshadowed by higher inflation expectations, as well as general talks and discussions around the tapering of stimulus across various major markets, and rising Covid-19 infections across many countries. Locally, equities struggled amidst a sharp dive in gold and platinum prices that filtered through to the large miners, as well as the general resources sectors, while the heavyweights Naspers and Prosus also sold off on the back of concerns regarding value unlock. The SA Listed Property Index (+3.4%) and the All Bond Index (+1.1%) beat the STeFI Index (+0.3%), while the Inflation-linked Bonds Index (-1.5%) and the SA All Share Index (-2.4%) underperformed. Global equities posted varied performance in June as moderating commodity prices, the reaction to the Fed's updated timing for rates lift-off, and idiosyncratic factors, such as politics, tempered performance. The S&P500 was a relatively strong performer, rising by 2.2% m/m and 8.2% for the quarter. The return from Europe was a more pedestrian 0.8% m/m and 4.6% q/q for the Eurostrox. The MSCI World Index total return of 1.5% trumped the 0.2% from the MSCI Emerging Market Index.

DISCLAIMER

Managed by: Boutique Investment Partners. Authorised Financial Service Provider, FSP Number 45011.

The fund allocation (above) indicates the holdings of the model portfolio, also referred to as wrap portfolios. The portfolio holdings are quantitatively and qualitatively assessed on a quarterly basis by the independent investment committee. Where any of the above funds are not available on any particular Linked Investment Service Provider (LISP) platform, an appropriately comparable replacement fund is selected by the investment committee. Due to the possible fund composition variations resulting from such comparable replacements, the actual overall asset allocation, fees and returns may differ across platforms. Periodic portfolio rebalancing is initiated by the investment committee to realign strategic allocations whilst taking specific account of the intended risk and return profiles of the portfolios as well as capital gains tax and cost effects. Past performance is not indicative of future performance and for the historical return purposes above it was assumed that before the launch date of the portfolio, the portfolio's holdings and asset allocation remained static during the entire back tested period. The capital or the return of a portfolio is not guaranteed. A wrap fund is a portfolio consisting of a number of underlying investments wrapped into a single product. Wrap funds are not legal CIS funds of funds as the wrap fund itself is not a collective investment portfolio, but is simply a collection of separate collective investment portfolios and money market accounts. With a wrap fund the investor has direct ownership of the underlying investments. Wrap funds are not regulated by the Collective Investment Schemes Control Act and do not have a separate legal status. They are regulated by the same legislation that applies to Linked Investment Services Providers (LISPs), namely the Stock Exchanges Control Act and the Financial Markets Control Act. Investors should take note that any changes made within a wrap fund can trigger capital gains tax.

The portfolio's performance numbers are based on a master portfolio tracked in the Morningstar Direct system. These performance numbers are net of all underlying managers TER's, but gross of the portfolio management, LISP and advice fees.

FAIS CONFLICT OF INTEREST DISCLOSURE
